Peter Williams

To Borrowers, it offers the means of acquiring a home, and in place of paying rent, allows the payment of monthly installments against the gradual cancelation of a mortgage debt.

To Investors, it affords perfect security and a higher rate of interest than that paid by any savings bank.

Since its organization, it has matured six series of stock at an average term of 114 months; and the interest paid to investors ranges up from six per cent per annum, depending on the term of the investment.
