

Stockton Business

COLLEGE

AND Normal Institute

This is one of the Oldest Business Colleges on the Coast

ITS GRADUATES OCCUPY positions of honor and trust throughout the mercantile community, and the thoroughness of their preparation has merited the commendation of business men everywhere.

The remarkable success and growth of this Business College is due to the following reasons:

I. *The Course is very thorough.* This school has never made any extravagant claims. It does not offer its diploma to any but those who have completed every part of its practical and complete course of Business Training. A graduate from this school has received the most thorough training given by any Commercial College in the country, and is competent to fill any position open to any young accountant.

II. *The Expenses are Reduced to a Minimum.* We have perfected a system of boarding which enables us to offer first-class board for \$10 per month—no more, no less. This is its exact cost to us. Room rent, including lights, \$3 per month and upwards.

III. *The Honest Dealing with our Patrons.* This school makes no profit on board, stationery, or books. Everything is furnished to students at cost. There are no extravagant charges.

IV. *No Grades.* Individual instruction given. The student can thereby advance as fast as his ability will permit, and he will not be kept back by others of less talent and application, nor will the backward student be obliged to pass over work which he does not understand, in order to keep up with a class.

Those whose early education has been neglected are instructed privately without extra charge, and any young man or woman who desires a business education should not fail to write to us.
