

RUPTURE!

IF RUPTURED YOU SHOULD BE CURED OR RELIEVED,

Without inconvenience or Restriction in Exercise or Diet.

Dr. Rowe, in order to arrive at the absolute certainty of the correctness of the peculiar course of treatment invented and adopted by him, devoted great attention to the mechanism of the structure involved in the course of Hernia, so that he is now assured, by a large experience, that it is in accordance with the principles of science, and with the most universally acknowledged practice of ARTISTIC SURGERY, and he asserts with confidence thus inspired that it permanently relieves all cases of reducible Hernia, without regard to the age of the patient or the duration of the injury, while it is wholly free from all the cruelty that has characterized the treatment of the malady with tortuous Trusses from the earliest age to the present day. He therefore invites the earnest attention of the afflicted and closest scrutiny of the profession.

Experience shows that all tempered spring Trusses necessarily press upon and often disease parts of the body that before were in a perfectly healthy condition. Lumbago and other equally distressing ailments are not unfrequently the outgrowth of such pressure, and in view of this fact it becomes a matter of decided consequence to avoid like calamities, if possible.

The cure of recent or chronic abdominal Hernia is assured under Dr. Rowe's treatment, on the following basis, to wit: First—That the pressure on the rupture itself can be made uniform and continuous, and to the extent required in each case, until a slight inflammation of the parts is secured and the consequent effusion of lymph which is essential to a healing process. Second—From this time to the conclusion of the treatment, the pressure, being entirely within the control of the patient can be lessened daily as the adhesion progresses, and the body becomes sound. No other instrument now in use is capable of such changes and modifications.

NO PERSON SUFFERING WITH, OR TROUBLED BY HERNIA, SHOULD BE WITHOUT THEM.

1st.—There are no tempered springs to confine the body.

2d.—There is no pressure upon the hips or back.

3d.—The pressure can be raised from one ounce to forty pounds.

4th.—Pressure only where the bowl escape.

5th.—Pressure up and back, therefore retaining the Hernia at all times.

6th.—This instrument is worn with perfect ease while riding horseback.

7th.—Rupture retained and the pressure the same while in any position.

8th.—Its extreme lightness and facility of adjustment give it a preference over any other now known to be in use.

The superiority of these instruments over the rigid Iron Hoops, which in former days were the only resource of the ruptured, admits of NO ARGUMENT. CONSULTATIONS AND EXAMINATIONS FREE.

DR. ROWE'S ABDOMINAL SUPPORTER FOR FEMALE WEAKNESS,

A Sure Relief at once.

DR. R. INVENTOR and Patentee of ELASTIC TRUSSES.

By The Perforated Frictional and Elastic Support Belts, the Best in the world for the prevention and cure of Rheumatism, Lumbago, Spinal Diseases, Weakness, etc., etc.
