

A Home Product

The Yuba is a home product. It is built in California for farmers.

If your Yuba Tractor needs replacements, parts or expert service, it's to our selfish interest to see that changes are made as cheaply and quickly as possible.

An idle machine is an expense to you and a poor advertisement for us.

We have an eye to future business—many years of it. That's one reason why we have a complete service station and stock of parts at YUBA PRODUCTS COMPANY, 333 "E" Street, Marysville, California.
