

Classified Business Telephone Directory Tells "Where To Buy It"

This Classified Business Directory not only furnishes the telephone numbers of business firms, but also contains buying information for many products and services.

In order to find the telephone number of a business concern, first locate the heading descriptive of the general type of business. All firms in this general line of business will be found under this heading. Each heading is arranged in its regular alphabetical order.

If you wish to find where an article or service can be purchased, locate the heading descriptive of that article or service and select the firm listed under it with which you desire to transact your business. Under this heading, also, may be found other headings descriptive of particular kinds of articles or services. These may be accompanied with the trade mark or brand name of the product.

For further information regarding this Classified Business Directory, please call Main 12300 and ask for the Directory Department.
