

To LOS ANGELES

AND ALL CALIFORNIA, OREGON AND WASHINGTON POINTS
NO CRATING NECESSARY

The Economical Way Safety

We are the originators of the shipping van, which is the latest, safest and most economical way of transporting furniture. The shipping van is a large metal container and is mounted on small roller-bearing rubber-tired wheels. The doors are clamped tightly shut by a special device, making these vans absolutely water or damp-proof.

Each piece of furniture is thoroughly wrapped with a heavy quilted pad and is solidly packed in these vans, which eliminates all danger of chafing by the movement of vans while in transit. The doors are securely locked, insuring the safety of all valuables until they are delivered into your residence at destination.

How Shipped

These vans are conveyed by a large motor truck to your residence, where they are loaded and then forwarded either by rail or water to destination. To points along the coast between San Diego and Vancouver, B. C., they are transported by the fastest passenger steamers. These steamers reach Los Angeles in less than twenty-four hours, and they make Portland and Seattle in from two to three days. This system is much easier on the goods than jolting along the highway by motor truck for several hundred miles. Let our salesman call and further explain this new and marvelous system of moving.

Nothing can show more clearly the selling power of the "Classified Business Directory" than the proven experience of the firms that use it.

American Shipping Van Service

586 Eddy St. Call—
Household Goods Prospect
Direct from Your Door to 1503
Residence at Destination
No Crating Necessary

THE Shipping VAN WAY
Furniture and Household Goods are carefully packed with regular furniture pads in our specially constructed and safely locked shipping Vans and transferred by steamer direct to destination where they are delivered to residence without any extra charge.

LOWEST RATES
Our rates are much lower than ordinary trucking rates, and besides we are able to transport your goods to far northern points, which would be prohibitive under trucking rates.

ABSOLUTE SAFETY
This service practically eliminates all danger of fire, theft, upsets, collisions and damage by jars and jolts, usually suffered by truck travel over hundreds of miles of roads. The insurance rate set by the Insurance Companies for this kind of transportation, being much lower than motor truck insurance, is conclusive evidence of the safety of this service.
