PREFACE.

The compiler of this hand-book has aimed at the answering of such questions, as also the giving of such information desired by those who are not thoroughly acquainted with our city, and will also be found most useful as a book of reference by all.

This volume will be found for sale on all incoming trains, as also at the leading bookstores, and will be revised and enlarged with each year of its publication.

It can hardly be expected but some errors may have crept in (these will be obviated on each re-issue), and feel sure by its production it is filling a void most acceptable as well as long needful.

The compiler can but feel grateful for the generous aid in its production, and feels sure, on each reproduction, its importance will be noted by those for whom it is intended.

Amusements.

San Francisco (in no boasting manner), can surely feel proud of her many places and opportunities for the amusement-loving public, and, without recounting the hundreds of excursions by either rail or steamer, she still contains no less than twenty-nine different places of evening amusement, to suit the varied tastes of so cosmopolitan a population as our own, three of which will compare with any in the land, and one which none can excel. A detailed black and white illustration of a tropical scene. On the left, a tall palm tree stands next to various tropical plants, including large-leafed foliage and a butterfly. In the center, a pond is depicted with several birds, including a large waterfowl on the right and smaller birds in the water. The bottom of the scene is filled with dense, diverse tropical vegetation. The entire scene is enclosed in a decorative border with a vine-like pattern on the right side.

Boarding.

Surely the conveniences for living in San Francisco cannot be excelled anywhere in the Union. As regards the outlay thereto, one can easily accommodate themselves to whatever expenditure their means will allow. Living in our city can cost as much per diem as in any in the known world, should the tastes be requisite and their pocket-book large enough;

but this is the extreme, and is only adapted to the casual, while on the other hand one can live neatly and at the same time as cheaply as is possible to do. We cannot recommend in any one locality, but give all, letting the stranger choose for himself, to wit: The hotels cannot be excelled in any land (see Hotels).

Next come private and pleasant boarding houses. These can only be reached by acquaintance. Some, again, may prefer rooms in pleasant localities, and meals at a neighboring restaurant; in order to so do, would advise consultation with the columns of the daily papers, and notice which will best attract the eye. After this, good restaurants or hotels will be found of easy access to almost all localities, which, with a slight acquaintance, one of a permanent nature will soon be selected. To those more economically inclined, the papers may again be resorted to for information regarding rooms for "light housekeeping." These can be obtained at a very moderate figure, and public markets abound throughout the city, where, with a basket on your arm, eatables of all kinds may be found beneath the same roof. Vegetables, meats, etc., are very reasonable, and one has little idea how economically they can live in this way, unless by a practical trial. Still, ones tastes in this mode of living sometimes causes the expense to be in excess of hotel charges, and to those we say, by all means visit them, as within their walls will be found any and all conveniences, and at prices to fit the purses of all.

Banks.

This city is certainly well supplied for the repository of moneys and valuables, there being no less than ten *private* banks or bankers, and twenty public institutions, to suit the requirements of almost any nationality or mercantile privileges.

FIRE DEPARTMENT COMMISSIONERS: In Old City Hall: E. B. Cotter, President.; Ed. Flaherty, Frank G. Edwards, F. C. Siebe, and John Mason.

FIRE DEPARTMENT CORPORATION YARD: Sacramento, bet. East and Drumm.

FIRE MARSHALL: John L. Durkee, Old City Hall.

FIRE ALARM AND POLICE TELEGRAPH: In Brenham Place ; John Curran, Superintendent.

Keys of signal boxes are deposited in the vicinity of each box, and at such places as are indicated on the boxes, where will also be found full instructions for turning on an alarm. The alarm is then sounded from the head office in Brenham Place, and then communicated to each engine house, where it is sounded three times. The city being divided into separate fire districts, with a separate proportion of the department allotted to each, in all ordinary cases, the men and engines in the district where a fire is taking place is deemed sufficient; still, at all alarms, all engines, etc., repair to the extent of their several districts, and then await a sufficient length of time to enable the Chief Engineer, or his Assistants, to note if more help is required; if so needed, the alarm is turned in again from the same box as before. This constitutes a general alarm, and signifies that the help allotted to that district is not sufficient to handle the fire; this brings forward the balance of the force then in waiting for such word at the boundaries of their districts. If no general alarm is so turned in, the men so waiting return to their respective houses.

WELCOME TO ALL.

COL. A. ANDREWS'
DIAMOND PALACE,

**A Feature of San Francisco. Every Visitor
Should Examine it.**

221 MONTGOMERY STREET.

**The Most Beautiful Jewelry Establishment
in the World.**

To visit San Francisco without seeing the Diamond Palace would be like visiting Europe without seeing Paris. It is a leading "feature" of San Francisco; indeed we might say of the Pacific Coast. It is a marvel of beauty and elegance. It is, unquestionably, one of the most magnificent jewelry emporiums in the world—the splendid conception of a master mind, a controlling genius. Artistic taste and skill challenge competition here. To be appreciated it must be seen.

ALL TOURISTS

visiting San Francisco should, without fail, visit Col. Andrews' Diamond Palace. It is indisputably the most beautiful, best arranged and highly gorgeous in display of any jewelry store in the world. Even as no one could neglect to see St. Peter's at Rome, or St. Paul's in London, so would it be an irremediable oversight for the visitor to our coast to depart without at least one look in the most famous jewelry establishment of either modern or ancient times.

And now we have but a single word more in concluding a mere outline of the career of one of the most enterprising and remarkable men of this country and this age, and of the triumph of his genius,

THE DIAMOND PALACE.

which no tourist can afford to lose sight of in his explorations among the marvels of this Western Coast. It is at the very door of all the leading hotels of the city,

No. 221 Montgomery Street,

and it should be visited both by day and by night, as the gas-light kindles it into a flashing scintillation of splendors. One only needs to see and talk with Col. Andrews to learn the knack of popularity and the secret of success.

In case of any large gatherings of disorderly persons or riots, the Mayor, or Chief of Police, may turn in an alarm, which will strike ten times, and be repeated five times; this will call the Police Department to the City Hall. ♣

There are 163 Fire Alarm Boxes. The telegraph lines consist of about 140 miles of wire. All bells and gongs are struck at the same time, by electricity.

Fire Department.

The Paid Fire Department of San Francisco was organized Dec. 3, 1866, and contains 320 men.

It consists of 12 Steamers; to each is attached a Hose Reel; there are also 8 Hose Carriages, and 4 Hook and Ladder Trucks, which are in active use; in addition to these there are 5 Steamers, 7 Hose Reels, and 3 Hook and Ladder Trucks, forming a reserve; these are located at the Corporation Yards, being always ready for active use, should they be called upon.

There are five miles of carbolized hose in use; 1,371 hydrants and 55 cisterns, holding 2,011,856 gallons. The total cost for running this department, per year, is \$285,000.

CHIEF ENGINEER: David Scannell.

TWENTY-FIVE YEARS OF PRACTICAL EXPERIENCE in the Optical business enables me, upon a mere examination of the eyes, to adapt Spectacles which will immediately remedy any existing defect of vision. Thousands of people have their eyes permanently injured by neglect, and by purchasing glasses from incompetent and inexperienced persons, which injury gradually increases and eventually ruins the sight. The eye, being the most delicate of organizations, needs

SKILL, CARE AND PROMPT ATTENTION

to preserve it, and I recommend all persons not to delay, but to **CALL AND HAVE THEIR EYES EXAMINED FREE** of charge and Spectacles properly adjusted if necessary.

Railroad and Ferry Time Tables.

In a work of this nature it is impossible to give entire time tables of all routes of travel, as the trains of arrive and depart and so constantly changing; any time mentioned (in most cases) would scarcely hold good a month.

The following table gives the departure of trains from this city on the Central and Southern Pacific Railroads and Ferry. Should any others be desired, the only reliable time can be obtained at the respective offices of the routes desired; their location can readily be found beneath their proper headings.

Street and Avenue Guide.

EXPLANATION: Market street is the starting point for the numbers of all buildings fronting on the streets running therefrom, while those forming the "water front" thereof shall be the starting point for numbers, except such as run from Market street. On all streets and avenues the numbers on the *right* hand side (from the point of beginning) are even numbers, and those on the *left* are the odd numbers. One hundred numbers (or as many as are necessary) are allotted to each block. The territory west of Laurel Hill and Odd Fellows' Cemetery is known as Outside Land; those running north and south are called respectively from First to Forty-ninth avenues; while those running east and west from First avenue to the ocean are known as A to W streets.

Hoadley's Addition is situated west of Pierce, and between Geary and Washington. Horner's Addition is south and near

Mission Dolores. Western Addition is west of Larkin street, San Miguel Ranch, southwest and near Mission Dolores Bernal Heights (B. H.) south of Twenty-sixth, between San Bruno and San Jose roads; and University Mound Tract (U. M. T.) west of San Bruno Road, five miles from the City Hall; and S. S. F. designates South San Francisco.

With this explanation we feel sure any desired location may be found; but should a doubt exist, the stranger will find at almost his every elbow a policeman, to whom any question may be asked, and the information desired will be most willingly given by these gentlemen.

Cor. Market and New Montgomery Sts.,

SAN FRANCISCO, - - CALIFORNIA.

The Palace Hotel, occupying an entire block in the centre of San Francisco, is the model Hotel of the World.

It has double the accommodations of any other Hotel in the City.

It is thoroughly Fire and Earthquake-proof, has broad, easy stairways and five Elevators.

Every room is extra large, light and airy. The system of ventilation is perfect, combining flue from fire place, inlet flue for fresh air from outside, and outlet flue to the roof.

A bath and closet adjoin every room.

All rooms are easy of access from broad, light corridors, leading from the glass covered court in the centre of the building.

The central court, illuminated by the electric light, its immense glass roof, broad balconies around it on every story, its carriage-way and its tropical plants, is an attractive feature, one hitherto unknown in American Hotels.

Guests entertained on either the American or European plan. The Restaurant is an adjunct to the Hotel, and is the finest in the City.

<i>Room without Board,</i>	- - -	<i>One Dollar per day and upwards,</i>

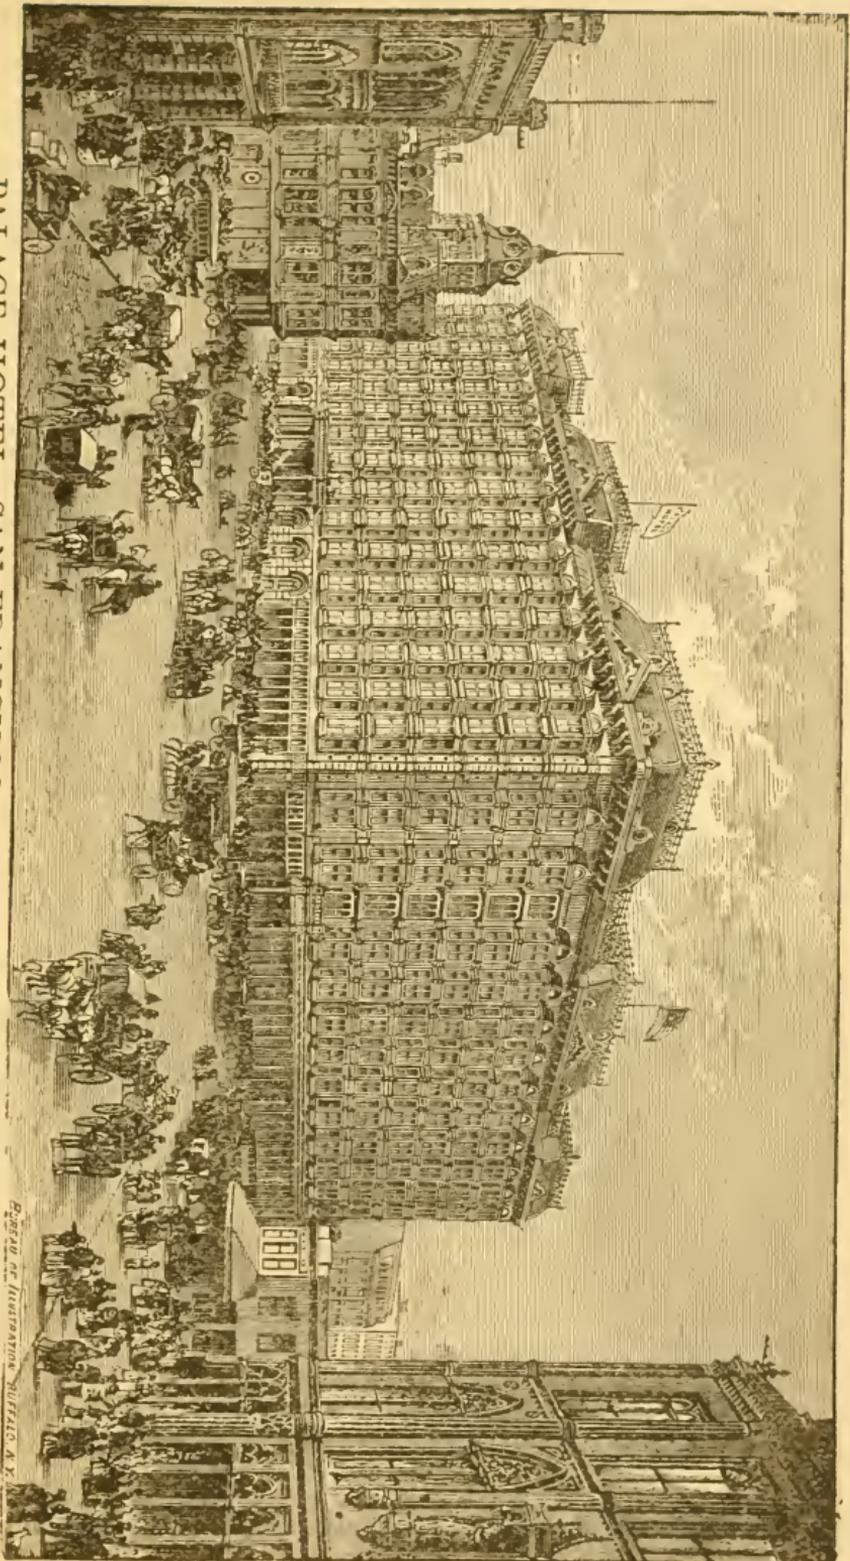

The Palace Hotel occupies the entire block upon the southwest corner of New Montgomery and Market streets; rearing its huge fronts a hundred and twenty feet, extending two hundred and seventy-five feet westerly up Market and Jessie, and stretching its vast flanks three hundred and fifty feet southerly along New Montgomery and Annie, this architectural monarch lifts its colossal bulk above the very business and social centres of the Pacific Metropolis.

Lines of horse-cars connecting directly with all the principal streets, business centres, leading places of amusement or resorts, and all notable localities, constantly traversing the entire city, even to its remotest suburbs, run directly by or within a minutes' walk.

Within and without, in all approaches, appointments and belongings, the kingly structure, far surpassing, not only in size, but in grandeur, all the hotels of Europe and America, richly justifies the propriety of its happily chosen name--The Palace Hotel.
