

E. W. WOODWARD & CO., suburban unimproved property for sale.

is considered that there are in the present volume the names of 9,184 adult males, and that the returns of the Census Marshal of children of all ages under 17, amount to 7,231, an aggregate from these two elements alone of 16,405, it will be admitted that our figures are a fair approximation to the actual number. Estimating the population on the basis of the number of names in the present volume, and assuming that each name represents three in the population, it would give 27,552 as the result, over ten per cent. more than the figures of our table.

The Sacramento Directory January, 1875, contains 7,000 names, and an estimate of the population of the city at 21,000. It will be therefore seen that Oakland is now the second city in point of population in the State. The Federal Census, 1870, returns the population of Sacramento 16,298; of Oakland, 11,164.

CLASSIFICATION OF DEATHS

OCCURRING IN THE CITY OF OAKLAND FROM JUNE 30, 1873, TO JUNE 30, 1875.

		1873-4.		1874-5.
