Wilkerson, M B, attorney at law

Shearer's Ferry, Idaho Co, P O

Shearer F A, postmaster

Shoshone County. Organized in 1864.

Bounded on the north by Kootenai County, south by Nez Perce County, east by Montana Territory, west by Kootenai and Nez Perce Counties. Area, 3,000 square miles. Assessed valuation of property for 1874, \$49,260. County seat, Pierce City. Oro Fino at one time existed as a thriving mining town but has ceased to present claims of importance. The resources of the county remain undeveloped, being at present limited to the gold placer diggings existing on the Oro Fino and Rhodes Creeks. The surface of the county is generally mountainous; and, as but very small tracts of fertile land exist along the river bottoms, in an agricultural sense it is valueless. It contains an abundance of good timber for manufacturing purposes.

Officers: W. V. H. Keith, Probate Judge; John Clark, District Attorney; John Rodgers, Sheriff and Tax Collector; D. M. Fraser, Recorder, and Auditor; R. L. Yantis, Treasurer; C. F. Brown, Assessor; P. Streeter, Coroner, I. B. Cowen, Superintendent Public Schools.

Silver City, Owyhee Co, P O and County

seat, 65 miles south of Boise City, is a straggling city covering about 80 acres of land, and situated on a branch of Jordan Creek, the centre of one of the richest mining districts in Idaho. A high and precipitous ridge separates it from Snake River, which is about ten miles distant. Some of its buildings are constructed of granite, but the majority of them are built of wood. It derives its chief support from a number of rich silver quartz ledges in the neighborhood, upon which about a dozen quartz mills are in active operation. The mining localities of Silver City are locally designated as Ruby Hill, War Eagle, and South Mountain. At each of these places are mines which have acquired a world-wide celebrity, and have produced many millions of dollars. The most noted are the Poorman, Pauper, War Eagle, Ida Elmore, Golden Chariot, South Chariot, Empire, Mahogany, Bay State, and Golconda. The veins are numerous, and generally do not exceed a few feet in thickness, but are rich in silver, chloride ores predominating near the surface, changing to ruby silver, or antimonial sulphurets, below the line of water in the mine. West and northwest of the city is a vein of porphyry, forming a mountain about 1½ miles long, half mile wide, and 1,000 feet high, said to assay \$3 per ton. All the gulches heading in this mountain have been rich in gold, and horn silver has also been found in some of them. Placer tin in small quantities and three veins of flintstone have also been discovered in the vicinity. The summer seasons are short but very pleasant, while the winters are long and severe. Daily stages run to and from Winnemucca, 208 miles distant, and Boise City. One newspaper, the *Avalanche*, is published daily.

Anderson D & Co, hotel
AVALANCHE, W J Hill, proprietor
Barbour Clitus, attorney at law
Bass & St Clair, foundry
Bigelow W D, general merchandise
Biggerstaff & Croek, wines and liquors
