

lectures on Chemistry, Metallurgy, Geology, Minerology, Mining and Engineering. The laboratories are ample to conduct the most refined investigation.

COLLEGE OF CHEMISTRY.—The course of instruction in the College of Chemistry is designed for those who wish to become professional chemists, either as teachers and investigators, or as metallurgists, assayers, and manufacturers in chemical industries; and also for those who wish to become expert chemists preparatory to the pursuit of medicine, pharmacy, mining, etc.

COLLEGE OF ENGINEERING.—The object of this college is to give thorough instruction in those studies which pertain to the profession of a civil engineer. In the advanced years instruction is also given in Physics, Geology, Zoology, and in certain literary branches, including Modern Languages, History, and Political Economy.

COLLEGE OF LETTERS.—The College of Letters maintains two courses, the Classical and the Literary. The former corresponds with the general course of studies in the great colleges of the Eastern States and England. The latter affords a most complete and thorough training in Modern Languages, Literature, History, etc.

Applicants for admission should be at least sixteen years of age, and bring satisfactory testimonials. Young ladies as well as young men are received as students. There is no charge whatever for tuition.

The number of students now attending the University is 264. In addition, in the colleges of Law, Medicine, and Pharmacy, there are 260 students. Total, 524.

COLLEGE OF MEDICINE.—Is held at Toland Hall in San Francisco, and affords ample opportunities for acquiring the highest degree of excellence in the theories of the profession.

COLLEGE OF PHARMACY.—Lectures are delivered twice a week in the Hall of the Academy of Sciences, San Francisco.

COLLEGE OF LAW.—The entire course of instruction extends through three academic years, and the school is separated into three classes corresponding to these three years, known respectively as Junior, Middle, and Senior.
