Mills Building. Telephone Garfield Nineteen

SAN FRANCISCO

Cantilever Shoe *for Men & Women*

The flexible Cantilever shank, with snug-fitting instep, helps the arch muscles and ligaments to maintain the normal position of the bones which form the foot arch. At the same time the shoe support is healthful, for the flexibility permits the foot to function as nature intended (the arch of the foot should flex with every step). Thus the muscles exercise and strengthen, circulation is stimulated, and weak or fallen arches are corrected or prevented.

The Shoes are strictly up to the fashion mode.

Expert Fitting Always
