

WARREN & SON'S HORTICULTURAL MUSEUM, AND HALL OF SCIENCE.

The subscribers take pleasure in announcing to their friends and patrons that they open their Hall as a Museum of Horticulture and Natural Sciences. Having now completed our arrangements in Europe and in this country, we are enabled to offer to the patrons of this establishment (the first of the kind in California) everything desirable connected with the science of Agriculture, Horticulture, and Floriculture.

Connected with this establishment will be Nurseries, Gardens, Fruit Orchards, Graperies, and Greenhouses of the proprietors, and therefore the patrons can be assured that it is much better for them to send their orders to first hands than to those who collect here and there, at auction and elsewhere, where there can be no certainty of the genuineness of what they buy.

The Nurseries will be extensive, containing several hundred thousand trees grown under the eye of the proprietors. The Fruit Garden will contain the choicest Fruits known in Europe and America.

The Museum will contain specimens of Fruit in Wax, rare and curious specimens of everything else in nature, both in wax and in a dried state; Oil Paintings, Drawings and Paintings of Fruits, Flowers, &c., together with specimens in Natural History, Books on Agriculture, Horticulture, and Botany; Garden implements of all descriptions and of the most approved patterns.

SEEDS.—A large and superior assortment of Garden and Flower Seeds, comprising all the new and rare varieties. Field and Grass Seeds of warranted quality, wholesale and retail. The Seeds sold at this establishment will be warranted pure and genuine, true to their name and preserved in a proper manner. Dealers will receive a liberal discount.

Boxes of Seeds for exportation at \$5 and upwards, so packed that they may be safely transported to any part of the world.

Packages of Flower Seeds, containing twenty varieties of Annuals, Biennials and Perennials, neatly packed in boxes, from \$3 to \$20.

Separate Catalogues of Fruit and Forest Trees, Vines, Shrubs, Evergreens, Dahlias, Roses and Greenhouse Plants, Garden and Agricultural Seeds, may be had on application.
