

DR. D. BURBANK,
DENTIST.

EXPRESS BUILDING,
N.E. cor. Montgomery and California sts.,
SAN FRANCISCO, CAL.

Would call the attention of persons wishing to have Teeth filled, to the fact that his operations on the Teeth are not excelled by any other Dentist in the City.

The greatest pains will be taken to make the Filling permanent.

To those wishing Teeth extracted, he would say that he has always met with the greatest success in

Removing Carious Teeth and Fangs.

CHLOROFORM and ETHER, from the best manufacturers in the States, I use with GREAT CARE.

I would say to those wishing

ARTIFICIAL TEETH.

That I model my Teeth expressly for the individual customer, so that to those unacquainted with Dental operations it may be well to say, Dentists usually select from an assortment of Artificial Teeth—larger or smaller, as they may have capital—separate Teeth to form the set. If they use Gum Teeth, there will be visible in the wearer's mouth a perceptible difference between the appearance of not only the Artificial and Natural Gum, but between different sections of the Artificial Gum. I obviate this entirely, by manufacturing a set of Teeth with a continuous Gum, formed and colored expressly for the particular space to be filled, so that the greatest possible degree of naturalness and strength is attained.

A clear and distinct articulation of speech is restored. This important change is effected by having the inside of the Teeth and Gum of a natural form. To this form the tongue is readily adapted. This perfect adaptation of the tongue to the denture, prevents the hissing or muffled sounds in speaking or singing, so often observed in persons wearing Artificial Teeth.

OFFICE,

Express Building, corner Montgomery and California sts.
