And the celebrated STRONG ALE, in Stone Jugs.

A trial will convince dealers that this is the best Ale ever imported into this market. The trade can rely upon a supply being kept on hand at all times, which will be offered at the lowest market rates.

### Pure Bourbon Whiskey,

**Selected Expressly for Medicinal Purposes.**

The benefits resulting from the judicious use of a pure and genuine Bourbon Whiskey, have induced the most eminent Physicians to recommend and prescribe it.

As a tonic and stimulant in various affections of the Lungs, and in many diseases attended with debility, exhaustion, etc., and as a preventive of the injurious results incident to change of climate in traveling, it has acquired a high reputation.

These virtues are found only in the pure and unadulterated article, which is not easily obtained. Having made arrangements for receiving it direct from one of the first Distilleries in Bourbon County, Kentucky, I would respectfully assure the profession and the public that this is entirely worthy their confidence.
