WHEELER & WILSON'S AMILY SEWING MACHINES.

m. c. mayorn,

AGENT.

No. 157 SACRAMENTO ST.

Between Montgomery and Kearny Streets,

SAN FRANCISCO, CAL

The attention of the Ladies of California is respectfully invited to the new and beautiful SEWING MA-

NE of WHEELER & WILSON, now for the first time introduced into this. The decided superiority of thi machine over any other, is acknowledged by rous heads of Families in this City, who have already tested its merits; recomations from whom may be seen at the office of the Agent, where specimens e found in operation.

OPINIONS OF THE NEW YORK PRESS.

profer the Wheeler & Wilson sewing muchines for iss. They will force the industry of Woman into and new channels, and emancipate her from the posture and slow starvation of needle-work."—

eler & Wilson's machines are especially adapted ork used in the family. They work more rapidly, as friction, and with greater economy of thread, get if not all others. They are the favorites of fam-

Wheeler & Wilson machine has secured and justly us the presentinence for sewing every kind of unit works equally well upon silk, linen, woolen and goods; seaming, quilting, gathering, hemming, h a strength and beauty superior to any hand-tepress.

oking out for the best, it would be well to see the s of Wheeler & Wilson before purchasing else--Examiner.

eler & Wilson's sewing machines combine everynt is required in the manufacture of garments."—

examining various machines, and seeing the ties of each, we have come to the conclusion that & Wilson's are the best ever offered to public parties are simple and durable; easily kept in work without noise; sew with great rapidity; even and firm stitch ou both sides, that will not nomize thread, and are applicable to every puramaterial common to the art in question."—

thorough examination, we conclude that the & Wilson is the machine par excellence for fund we recommend it most emphatically."—Advournal.

unily use, the Wheeler & Wilson machino justly s the pre-eminence. It is remarkable for elegance and finish; simplicity and thoroughness of con-; lightness and rapidity of operation; case of cont; economy of thread, and durability of seam."

Vioton desires me to express to you her entire in with your sewing machine, which she has nded to several of our friends. I may add, that from the frequency of the rapid tick of the majoromotes both industry and pleasure, My pirse nees that the sewing machine, among its other se, is a household economy. Mrs. Vinton joins gentlewomen in the public commendation.—
Francis Vinton.

"Among all the various objects exhibited at the Crystal Palace, we thought the sewing machines the most useful and Interesting to the ladies. They have become a domestic institution, and are destined to relieve Woman from the long train of appalling evils resulting from handsewing. After a thorough examination of all the machines offered to the public, we confidently assert the excellence and pre-eminent superiority of the Wheeler & Wilson machine for family use, and for sewing generally."—Ladies' Visitor.

chine for Jandy use, and for sewing generally. —Laure Visitor.

"During the last six months we have had in our parlor, and among its most elegant adornments, too, a very beautiful sewing machine, tron the establishment of Messrs, Wheeler & Wilson, on which it has been our ambition to become a proficient, when this well-used pen has given us a moment's time for the needle. But, for the life of us, we cannot get over the iden that there is some fulry-work growing under our fingers whenever we get a moment of this most delightful occupation. To see nearly stitched seams gliding through our fingers at the rate of a yard a minute—to see a shirt made in less time than Is necessary to cut it out—and a shirt-bosom covered with tiny plaits, exquisitely slitched, completed almost while a hady could sew out a needlefull of thread—partakes absolutely of the marvelous. All this is making play of work, and making usefulness an elegant accomplishment. Our nanchine now will make three dresses in far less time than the dressmaker requires to fit one. It will bem handkerchiefs, do all sorts of fancy stitching, and rival the duintiest work of the whitest fingers with magical neatness. It only requires a little cure, a drop of olive oil now and then touched to the delicate mechanism, and you have the motive power of fifty seamstresses doing ornamental duty in your parlor; while out of active use, eating nothing, and never slaging the mournful 'Song of the Shirt,' stitch, stitch, stitch,"—Mrs. Ann S. Stephens' New Monthly.

"I find your muchine invaluable. I have used it a year.

6.1 find your machine invaluable. I have used it a year, and it has never been out of order. The stitch is very durable, and can be adapted to fine or coarso material."—Mrs. Anna Cora Richie.

"Full examination has resulted in a most thorough conviction of the superiority of Wheeler & Wilson's machines, and of their perfect adaptatian to family sewing in all its varieties. The speed averages about twelve hundred atitches per minute, though they may be run at double this. Fifty dozens of shirt collars, or six dozens of shirt bosons, are a day's work. Their efficiency is equal to at least twelve semnstresses. Sewing is rendered a pleasing and healthful employment."—Golden Prize.
