

HUCKS & LAMBERT'S

CELEBRATED PATENT

ANTI-FRICTION AXLE-GREASE.

This extraordinary Lubricating Compound is produced by a chemical combination of suitable oily substances, purified by distillation, and

EFFECTUALLY

freed from the resinous or pitchy matter which attaches to all oils, more or less, in their unrefined or natural state. In operation, the **PATENT GREASE** works free from Coomb or Gum;

PREVENTS

Friction by keeping the heaviest bearings in a soft, oily state to the last; and, as its consistency is not altered by exposure to the hottest sun or coldest frost, (its liquifying point being 200 degrees,) it follows that, on axles which have a tendency to become hot from too heavy abrasion, etc., the Anti-Friction will adhere to and keep them cool, when other substances would run off and become dry; thus the evil known as

"FIRING OF WHEELS"

is, by its use, effectually prevented.

The proprietors will guarantee one application of their **PATENT GREASE** to carry the heaviest loaded team from 300 to 500 miles, without requiring to be regreased on the road.

HUCKS & LAMBERT.

N. B. We respectfully caution our friends to ask for **Hucks & Lambert's Patent Axle Grease**, as there are several spurious imitations in the market.
