

SAN FRANCISCO WOOLEN FACTORY.

These works are located at Black Point, on the block bounded by Beach, North Point, Polk and Van Ness Avenue. Capacity, 100 to 150 pairs blankets per day, depending upon the size and quality. Wool used per day, 1,250 pounds. Number of persons employed, men 30; women, 30; boys, 10. Total, 70. Capital invested, \$100,000. The operations of this factory since the commencement, December 15, 1859, have fully tested the energy and practical skill of the enterprising proprietors, to whom the State is indebted for the successful establishment of one of the most necessary branches of mechanical industry. The satisfactory results of a movement of this character cannot fail to direct attention to the importance of extending a liberal encouragement to our home mechanics' in their efforts to develop the resources of the State. David S. Turner is general agent; Office and Depot at Heynemann, Pick & Co.'s, 89 and 91 California street.

FURNITURE.

One of the most important branches of California industry is the manufacture of furniture. Heretofore, large amounts of money have been monthly remitted East and to Europe, for the payment of the heavy importations of furniture that were required to meet the demand occasioned by the influx of a large population and the rapid growth of the State. By the exertions of our enterprising mechanics, a large portion of this trade will henceforth be secured to this State. The pioneers and the most prominent of those engaged in effecting this result, is the house of J. G. Clark & Co., 128 Washington street, to whom great credit is also due for the rapid development of this branch of our home productions. The manufactory of these gentlemen is of the most extensive character, comprising all the various departments necessary to transform the roughest material into the most elegant and finished articles of domestic utility. A large proportion of the finest furniture sold by this extensive firm is manufactured at their establishment, and as specimens of workmanship, will favorably compare with the most costly manufactured at the East. There are several specimens of wood grown in this State and on this coast, that are suitable for manufacturing purposes, and considerable quantities thereof are annually consumed in the operations of this establishment. The number of men employed is 50.

The extensive establishments of J. Peiree, 115 and 117 California street, and J. P. Goodwin, 140 Washington street, are also well supplied with an extensive assortment of furniture of their own manufacture, and of Eastern importation.

AGRICULTURAL IMPLEMENTS.

The extensive establishment of T. Ogg Shaw & Co., on Sacramento near Davis, for the manufacture of a variety of agricultural implements, including several of California invention, has been for some months in successful operation. There is probably no State in the Union in which a greater demand for labor-saving machinery exists than in this, and the enterprising proprietors have, therefore, an extensive field for their exertions. The number of men employed is 30.

SAN FRANCISCO GLASS WORKS.

Established 1859. Location, corner of Beale and Howard streets. Number of men employed, 10. Capacity, 4,000 pounds per day.

An abundance of material for the manufacture of glass is to be found in this State, and a remunerative field is therefore open to the enterprising proprietors of these works.

BILLIARD TABLES.

There are nine establishments in this city engaged in the manufacture of billiard tables, affording constant employment to from 40 to 80 persons. One of the most prominent is that of M. E. Hughes, 180 and 182 Montgomery street. He is the sole agent on the Pacific coast for Mr. Phelan's justly celebrated Model Billard Tables and Patent Combination Cushions. In this concern, alone, there are constantly employed from 10 to 15 men.

CAMPHENE AND OIL.

There are six establishments engaged in the manufacture of camphene and the refining of oil, the aggregate capacity of which is estimated at over 50,000 gallons per month. The works of A. C. Dietz & Co., and Stanford Brothers, are the largest and most complete.

FLOUR MILLS.

The number of flour mills is nine, the aggregate capacity of which is nearly 1,000 barrels of flour per day. The most extensive of these mills are the Eureka, New Genessee, Golden Age, Golden Gate, and Commercial Mills.

RICE MILLS.

The number of mills engaged in the cleansing of rice, coffee, etc., is two. The Oriental Mills,
