

Pacific Map Depot.

"This establishment, started by Mr. ADREIN GENSOUL, No. 511 Montgomery street, to meet a want long felt upon this Coast, is receiving the substantial success it deserves.

The idea of collecting together not only general Maps, Atlases, Globes, &c., but special Maps of States, Counties, Cities, Mining Districts, and the like, and creating facilities for the drawing and publication in map form of information of much practical value to the people of our Coast was a happy one, well with the times, and deserved success.

Much the larger number of maps lately issued here have come from his establishment, and for correctness, beauty, and low price stand deservedly popular. His map of Sonora, Chihuahua, &c., would do credit to the best establishment in the Eastern States, while his new "Railroad Pocket" Map of the City, giving the railroad routes, the wards as redistricted by the last Legislature, &c., &c., is a gem for beauty, and, as for cheapness—well, fifty cents *is cheap*.

We learn that several new and valuable maps are being prepared, and will be brought out speedily; and, to any one having a valuable drawn map, which he wishes published—to any who publish maps, and desire them intelligently circulated—to dealers wholesale and retail—to canvassers especially, (and there is no better property for profit to canvassers, thousands of men in the States making handsome wages on these articles alone)—to any who want maps of any size or locality, from the World down to a section of Gold Hill, we say, give our friend a call, and assuredly you will be pleased with the "Pacific Map Depot,"—pleased with its affable proprietor, and *pleased* with the map you buy and the price you pay for it."

The "Rail Road" Pocket Map mentioned above adorns the front of our volume.
