

# NUMERICAL DIRECTORY OF THE PRINCIPAL STREETS,

IN ACCORDANCE WITH THE NEW NUMBERS.

[COMPILED EXPRESSLY FOR THIS WORK.]

 For Alphabetical List of Streets, Avenues, etc. see page 468.

**NEW NUMBERS.**—The Ordinance for renumbering the buildings of this city provides that—"Market Street shall be the starting point for the numbers on all buildings fronting on the streets running therefrom in a northerly direction, and also for those running therefrom in a southwesterly direction. The streets laid down in the official map of the city as forming the water front thereof, shall be the starting point for numbers on all streets running westerly and south-westerly therefrom, except upon such streets running westerly commencing from Market Street, and upon all such streets Market Street shall be the starting point for numbers. On all streets the numbers on the northerly or north-easterly sides thereof shall be even numbers, and on the southerly or south-westerly sides thereof shall be odd numbers. One hundred numbers, or as many thereof as may be necessary, shall be allotted to each block bounded by principal streets; numbers 100, 200, and 300 being respectively the numbers for commencing the blocks distant one, two, and three streets from the starting point on the side designated for even numbers, and numbers 101, 201, and 301 in similar manner for the opposite side of the street, throughout its extent; so that the initial figure of the number placed on a building at any street-crossing shall indicate the number of main streets, such street-crossing is from the starting point. Not less than twenty feet in frontage of all vacant lots of ground shall be allowed for each number. On all cross or intermediate streets the numbering shall commence where said streets begin, and shall conform to the plan specified in this order."

By this new decimal system of numbering buildings, the exact location of any number is readily ascertained: for instance, if you want to find 624 Montgomery, it is on the east side of the block extending from Clay to Washington, which is the seventh from Market—Commercial and Merchant being private streets. Again: 825 Clay is above the eighth block from the water front, which is the one extending from Dupont to Stockton. It must be borne in mind that 100 numbers are allowed on each block between principal streets.

(a) End of street. (b) Not opened. (c) Fractional Blocks, one hundred numbers allowed for first two blocks. (d) Fronting the bay.

BATTERY.				Stockton				Harrison			
<i>Commences at Market and runs North to Lombard.</i>				200		201	400		401
