

# MINING AND SCIENTIFIC PRESS

**DEWEY & CO., Publishers,**

Office, 414 Clay St., below Sansome, San Francisco.

Subscribe for the Mining and Scientific Press.

The Press was established in 1860, and has been enlarged from time to time, until it now contains sixteen pages—size of *Harper's Weekly*.

It is printed on extra quality of paper, rendering it a handsome volume to file for future use.

A large amount of editorial labor is constantly expended in the preparation of leading articles relating to the progress of scientific developments

Information contained in one article has been known to benefit a single subscriber an hundred fold the cost of a year's subscription.

The Press, as a mining and mechanical journal, has met with unrivalled success.

Sample copies sent free on application.

Subscription, \$5 per annum.

SAN FRANCISCO.

MODERATE AND UNIFORM PRICES TO ALL.

PRINTING OF EVERY VARIETY CORRECTLY AND PROMPTLY DONE.

in various parts of the world; new discoveries in geology, mineralogy, metallurgy, and new processes and methods relating to mining in all its branches.

Illustrations are given of apparatus for saving precious metals, and of machinery and inventions of general interest.

Each number treats carefully on subjects of home trades, manufactures and domestic economy.

Our mining summary and weekly stock report gives the latest news from the most important mines and mining districts throughout the Pacific States and Territories.

An official list of patent claims issued to inventors on the Pacific Coast, is published in advance of all other journals.

The latest prices of stocks are quoted; also the produce and market rates, metal market and prices of copper ores.

"Answers to Correspondents" afford much of interest to readers and of advantage to the community.

The Mechanical and Scientific Miscellany contained on a single page of each issue we are frequently told is worth the price of the whole paper.

## Job Printing.

We employ the best workmen in this department, and promise our customers—(many of whom have patronized the office for over eight years)—the best of work at very fair and uniform rates.

We are constantly adding new presses, type, and other material to our stock, making our facilities good for doing a wide range of work for merchants, mechanics, inventors, manufacturers, and tradesmen of all classes.

To ENGRAVING and ELECTROTYPING, for illustrating books and circulars, we pay particular attention; guaranteeing our customers satisfaction in this line difficult to be secured elsewhere.

Printing in colors, bronze, plain and ornamental style promptly done. Especial care given to working engravings.

## The Best Advertising Medium on the Pacific Coast.

Our terms for advertising in the MINING AND SCIENTIFIC PRESS are very low considering its wide circulation among the most intelligent and industrial classes.

All advertisements inserted in the PRESS are contained in the MONTHLY SERIES of the MINING AND SCIENTIFIC PRESS, which (by special arrangement) are placed for FREE READING in the principal hotels, steamboat and steamship saloons, depots, and public libraries in San Francisco, and the Pacific States. Many volumes are also bound, thus affording permanent advertising.
