

# PUBLIC STREETS, AVENUES, SQUARES, PLACES, ETC.

OF THE CONSOLIDATED

## CITY OF SAN FRANCISCO.\*

IN ACCORDANCE WITH THE OFFICIAL INDEX MAP, 1868.

**EXPLANATORY.**—The Ordinance for re-numbering the buildings of this city provides that "Market Street shall be the starting point for the numbers on all buildings fronting on the streets running therefrom in a northerly direction, and also for those running therefrom in a southwesterly direction. The streets laid down in the official map of the city as forming the water front thereof shall be the starting point for numbers on all streets running westerly and southwesterly therefrom except upon such streets running westerly commencing from Market Street, and upon all such streets Market Street shall be the starting point for numbers. On all streets the numbers on the northerly or northeasterly sides thereof shall be even numbers, and on the southerly or southwesterly sides thereof shall be odd numbers. One hundred numbers, or as many thereof as may be necessary, shall be allotted to each block bounded by principal streets; numbers 100, 200, and 300 being respectively the numbers for commencing the blocks distant one, two, and three streets from the starting point on the side designated for even numbers, and numbers 101, 201, and 301 in similar manner for the opposite side of the street, throughout its extent; so that the initial figure of the number placed on a building at any street-crossing shall indicate the number of main streets, such street-crossing is from the starting point. Not less than twenty feet in frontage of all vacant lots of ground shall be allowed for each number. On all cross or intermediate streets the numbering shall commence where said streets begin, and shall conform to the plan specified in this Order."

By this new decimal system of numbering buildings, the exact location of any number is readily ascertained: for instance, if you want to find 624 Montgomery, it is on the east side of the block extending from Clay to Washington, which is the seventh from Market—Commercial and Merchant being private streets. Again: 825 Clay is above the eighth block from the water front, which is the one extending from Dupont to Stockton. It must be borne in mind that one hundred numbers are allowed on each block between principal streets.

Several of the principal streets have been erroneously numbered. Bryant, Greenwich, Lombard and Vallejo each vary one hundred from the official map, which has been strictly adhered to in the compilation of the present Street Directory. The following streets are but partially opened, and each differ materially from the plan originally laid out, viz: Clementina, Jessie, Minna, Natoma, Ritch, Shipley and Tehama.

The principal streets southeast of Market, and running parallel to Fifth, have been, by an Ordinance of the city, changed, and they are to be designated hereafter numerically, as follows; Simmons to be Sixth, Harris as Seventh, Price as Eighth, Johnston as Ninth, and so on, as far as such parallel streets continue.

Reference is frequently made in the Register of Names to the following, and which are located, as follows: Hoadley's Addition, situated west of Grant or Pierce between Geary and Washington; Horner's Addition, south and near the Mission Dolores; Western Addition, west of Larkin; San Miguel Ranch, southwest and near the Mission Dolores; Bernal Heights, (B. H.) near the San Bruno Road and south of the Potrero Nuevo; and University Mound Tract (U. M. T.) West of San Bruno Road, five miles from the City Hall. See, also, Prominent Places, page —.

The names of the principal streets west of Larkin have been changed upon an unofficial map of this city recently published, viz: Gough to Lafayette Avenue, Octavia to Jefferson Avenue, Laguna to Clinton Avenue, Buchanan to Monroe Avenue, Webster to Webster Avenue, Fillmore to Fillmore Avenue, Steiner to Madison Avenue, Pierce to Hamilton Avenue, Scott to Scott Avenue, and Devisadero to Devisadero Avenue. As these alterations have not yet been sanctioned by the Board of Supervisors, the original names have been retained in the canvass for the work. —[COMPILER.

(a) End or beginning of a street. (b) Not opened. (c) Fractional Blocks, one hundred numbers allowed for first two blocks. (d) Fronting the bay. (—) Street does not cross. B. H., Bernal Heights. U. M. T., University Mound Tract. S. S. F., South San Francisco. A blank is used where the number at the crossing of a street could not be ascertained.

\* The streets of the district known as South San Francisco, extending from the Bay of San Francisco west to the San Bruno Road, and from Tulare Street south to the County line, are not included. They are laid out as follows, viz: Those running in a northwesterly direction are known as avenues, from one to thirty-eight, and those southwesterly are distinguished as streets from A to S, respectively.
