

The Scientific Press

AND PATENT AGENCY.

THE SCIENTIFIC PRESS, devoted to SCIENTIFIC AND MECHANICAL PROGRESS, MINING, FARMING AND MECHANIC ARTS, contains more VALUABLE READING MATTER than any other weekly journal west of the Rocky Mountains. It is the best printed and only finely illustrated paper on the Coast. Its articles are able, timely, and reliable, and written in a more interesting and easily comprehensive style than scientific papers in general. Now in its twentieth volume, it is printed on superior paper, containing sixteen pages, equal in size to the first-class journals of the Atlantic States and Europe. All our better citizens have an active interest in the new discoveries and in the development and progress of the three great industrial pursuits named above, which are closely allied on this coast and jointly represented in the PRESS, rendering the paper a popular and influential journal with all industrial readers. Subscription reduced to \$4 a year Jan. 1, 1870.

The PRESS is the most valuable and best patronized weekly advertising medium in the Pacific States.

To Inventors on the Pacific Coast.

Our U. S. and Foreign PATENT AGENCY presents many and important advantages as a Home Agency over all others, by reason of long establishment, great experience, thorough system, and intimate acquaintance with the subjects of inventions in our own community. All worthy inventions patented through our Agency will have the benefit of an illustration or description in the SCIENTIFIC PRESS. We transact every branch of patent business, and obtain patents in ALL CIVILIZED COUNTRIES.

The large majority of United States and Foreign Patents granted to inventors on the Pacific Coast during the past few years have been obtained through our Agency. Established in 1860, we have an extensive patent library, with full record of cases on this coast, with complete U. S. reports, and can give the best and most reliable advice as to the patentability of new inventions. Advice and illustrated circulars free. Our prices are now as favorable as any first-class agencies in the Eastern States, while our advantages for Pacific Coast inventors are far superior.

The Illustration of Inventions

In the SCIENTIFIC PRESS is a high recommendation for them, and is the best and cheapest method of bringing them to the notice of the public in a proper manner, besides being the most effectual method of selling valuable patent rights and patented articles.

Engraving on Wood

Of every kind, for illustrating machinery, buildings, trade circulars, labels, plain or in colors, designed and cut in the best style of the art by experts in our own office. Also engraving on metals.
