—Pupils registered, 58; average attendance, —.

**GEARY STREET PRIMARY SCHOOL** (Location, Geary, between Pierce and Scott).

#### Colleges and Private Schools.

**ST. IGNATIUS' COLLEGE.**—This well-known literary institution, located on Market Street, between Fourth and Fifth, which is conducted by the Fathers of the Society of Jesus, was first opened for the reception of students on the fifteenth day of October, 1853, and was incorporated under the law of the State on the thirtieth of April, 1859, and empowered to confer the usual degrees and academical honors. Since its commencement, this institution has been attended with the highest degree of prosperity and success. The course of instruction pursued is thorough, and comprises a complete classical, mathematical, and philosophical course of training, calculated to prepare the pupil for entering upon the study of any of the professions, or commencing any business vocation. The college is provided with an extensive laboratory, comprising all the necessary appliances for the assaying of metals and making chemical analysis, which is an important feature not generally found in institutions of this character. There is a telegraphic room, with an instrument in operation, where the business of operating is taught. The "Ignatian Literary Society," for exercise in debate; the "Philhistorian Debating Society," to promote the knowledge of history; the "Loyola Scientific Academy," for the cultivation and promotion of the study of natural sciences; a College Band and singing classes are established in the college for the improvement of the pupils. The founders of this institution, foreseeing the rapid progress of the Queen City of the Pacific, purchased some years since the property upon which the magnificent college edifice has since been erected. This lot has a frontage of two hundred and seventy-five feet on Market and the same on Jessie Street, with a depth of three hundred and fifty feet. The present building is only a part of the extent contemplated. When the extensive additions are made, the entire structure will rival anything of the kind to be found in our portion of the country. The present building is admirably adapted to the purposes for which it was designed, being abundantly lighted and well ventilated in every portion; the ceilings are lofty, and spacious halls run through the building. A large play ground is attached, with a commodious shelter from the rain, affording ample means for the physical exercise of the pupils. In fact, nothing has been neglected which is at all conducive to mental and physical training. The number of students in the college at present is over five hundred, under a staff of twenty-four professors and teachers.—[See Advertisement, page xxxix.]

**SANTA CLARA COLLEGE, SANTA CLARA.** This establishment is under the superintendence of the Fathers of the Society of Jesus, and is open to all who choose to avail themselves of its advantages. It is situated in the beautiful Valley of Santa Clara, so celebrated for the mildness and salubrity of its climate, and is about three miles distant from San José and quite close to the Southern Pacific Railroad. The college was founded in 1851. On the twenty-eighth of April, 1853, it was incorporated and empowered to confer degrees and academical honors, and to exercise all the rights and privileges common to any other literary institution in the United States. It has a full staff of professors, and presents advantages for the mental, physical, and moral training of the students unsurpassed in California. It possesses a complete philosophical apparatus, purposely made in Paris for Santa Clara College, and furnished with all necessary instruments for experiments in mechanics, hydraulics, pneumatics, caloric, electricity, magnetism, optics, acoustics, and surveying. New and important additions are being made every year to keep pace with the progress of science. The chemical laboratory is provided with a full assortment of chemicals, a very good set of furnaces, and all that is necessary for the different kinds of chemical analysis. The museum of natural history comprises a valuable collection of mineralogy and geology; also three thousand specimens of shells and other natural curiosities. As an accessory to the scientific department, there is a photographic gallery, where the students who wish may learn photography in all its different branches. Practical lessons are given also on the electric telegraph. The college library numbers about twelve thousand volumes.—[See Advertisement, page xli.]

**HEALD'S BUSINESS COLLEGE.**—This popular school is located at 24 Post Street, between Montgomery and Kearny. It is well known throughout the country as being the largest and one of the most thorough and complete commercial institutes in America. It has a total yearly attendance of about seven hundred and fifty pupils. Among these pupils are found the sons of many of our most prominent business men. Students are also to be found here from every county in the State, from all the neighboring States and Territories, from British America, Mexico, Central America, and the Sandwich Islands. Hald's Business College is connected with the International Business College Association, which includes the leading commercial schools in the United States and Canada. There are thirty-six schools in the association, located in all of our leading commercial cities. These schools—formerly known as the Bryant & Stratton Colleges—
