### **CUSTOM COLOR GLASS TINTING**

- 1 PROTECTS YOUR FABRICS AGAINST FADING:** Sun/Down "flow-on" and Mylar coatings protect all your valuable drapes, carpets, furniture or displayed merchandise against costly fading.
- 2 CUTS DOWN EYE-IRRITATING GLARE:** Sun/Down plastic coatings reduce the glare from the sun's direct rays. In the home, it lets you enjoy any view to the fullest. In a store, displays remain attractive indefinitely, and fresh foods can stay fresh much longer.
- 3 IT'S EASY AND ECONOMICAL TO APPLY.** Sun/Down coatings can be applied rapidly through either the exclusive "flow-on" process, or (in the case of Mylar) as adhesively attached sheets. There's no messy spraying, no brushing. The "flow-on" and Mylar coatings dry quickly and last for years.
- 4 YOU'LL ELIMINATE THE NEED FOR COSTLY TINTED GLASS OR UNSIGHTLY SHADES:** One single and inexpensive application of Sun/Down coatings gives you the permanent protection at a fraction of the cost unobtainable with expensive tinted glass. Our special window coatings do away with the need for blinds, shades or plastic covers — as well as the necessity for bothersome continued maintenance.
- 5 YOU HAVE A WIDE CHOICE OF ATTRACTIVE SHADES:** Sun/Down "flow-on" and Mylar plastic coatings come in many beautiful shades — including a cool, blue-black for perfect privacy . . . neutral smoke-grey for brightness control . . . a dazzling gold to cheer up any setting . . . or a reflective silver for viewing from one side only. There's a Sun/Down coating for every taste. All colors are fully transparent.
