# FRUIT TREES

Trees grown in this Nursery do better for all locations than those from low or irrigated nurseries.

The varieties of PEACH I am propagating are free from the "curl," and *experience* has taught me that the only way to avoid the "curl," is to raise the varieties which are positively known to be free from the disease.

My Orchard and Vineyard contain the

## BEST VARIETIES OF FRUIT.

All customers for Fruit or Trees will be properly and promptly waited upon.

My CHERRY TREES are remarkable for fine fruit, and early and prolific bearing.

My experience in the Nursery business stretches over a period of Twenty-Five Years, sixteen of which have been devoted to Fruit Culture in this State.
