AGAINST PACIFIC MAIL.

A Strong Competitor to Enter the Field.

NEW CENTRAL AMERICAN LINE.

The Railroad from Guatemala City, on the Pacific, to Livingston, on the Atlantic Side.

The Panama railroad is to have a strong

This will tend to curb the power of the Pacific Mail-a consummation devoutly to be wished. From letters received in this city yesterday the republic of Guatemala is reported to be in a more prosperous condition

than ever since Reyna Barrios has taken charge of the reins of government. Congress has just voted \$1,500,000 to start the work on the northern railroad, which runs from Guatemala City to Livingston on the Atlantic side, and when completed will give direct communication to New York

within five days. This will sound the deathknell of the

Pacific Mail's monopoly, which has ground the people of this country for so many President Barrios has entered into many large contracts for the improvement of the

city and its surroundings, and has accomplished more in the two months he has been n office than was accomplished by Barrillas in his full term of six years.

A good many foreigners are flocking thither, but the country is suffering greatly from the lack of laborers and much of its coffee is going to waste on that account.

If the road from Gratemala to Livingston is built as proposed it will be of great bene-

is built as proposed it will be of great benefit to San Francisco.

It will undoubtedly lead to the establishment of a new line of steamers between this port and Guatemala, and a correspond-ing line on the Atlante side to New York. Then freight and passenger rates will come tumbling down, and the \$75,000 a month subsidy now paid by the railroads to the Pacific Mall will be paid no more and will be saved to San Francisco.

The shippers of this city will take genu-

ine interest in the construction of the new It may be that in a few years the Pacific Mail and the Transcontinental Associa will not have things all their own way.

THE PUGILISTS.

The Murphys Will Finish Their Battle on Wednesday Evening.

The efficers of the Pacific Athletic Club decided yesterday that the Murphy-Murphy fight, which was not finished last Tuesday evening, must be concluded on the 8th ins The feather-weights were notified yesterday of the officers' ultimatum, and, although they are still suffering from the effects of the punishment they received, their trainers have taken them in hand again and they will be put in as good condition as they can possibly be got in the short space of time intervening between now and next Wednesday evening.

Billy Murphy is the worst off physically speaking. His right hand is in a badly disspeaking. His right hand is in a badly disabled condition, but his trainers assert, however, that it is still good enough to make an opponent suffer. Johnny Murphy is almost as fresh as he had been before the contest, and his friends believe he will certainly lower the colors of the New Zealander the next time they meet. It is thought, however, that the directors will make some provisions to prevent a walking contest. It is the general confinion that after a few rounds the fighters. inion that after a few rounds the fighters which must result in an unfinished contest. The members of the club, although they may desire to see the contest finished, will make a vigorous protest against anything that will have the semblance of a pedestrian

An amateur athletic club has been organ ized in the Golden Gate Park district, and has been christened the West End Club. I will give its first entertainment on July which will consist of two 10-round cor and four-round preliminaries. The club-rooms are situated near the Bay District

Track.

Some pools were sold yesterday on the Goddard and McAuliffe fight. The former sold at \$125 against \$100 on the Californiae. A large number of sporting men have visited the heavy-weights, and those who have seen Goddard thump the bag were thoroughly impressed with his great hitting powers.

FEDERATED TRADES.

Money Coming In for Sufferers of the Roslyn Mine Explosion.

T. H. Supple presided at a meeting of the Federated Trades last evening, and reports

Miss A. Quinlan and Miss K. Wallace. from a number of delegates showed liberal contributions to a fund for the sufferers by the mine disaster in Washington. An appeal was made some time ago to the various labor unions of the city for assistance, and according to the reports of last evening they are all responding freely.

President Fuhrman of the Brewery

President Fuhrman of the Brewery Workmen's Union stated that the outlook for the brewers is good.

During the meeting W. J. Mackey of the Sallors' Union reported the fatal stabbing of a union sailor on the water front, and he was assured of the support of the federation in prosecuting the assailant.

J. R. Sovereign, at the head of the Bureau of Labor Statistics of lows, will address the toilers of Oakland on the questions of the day at Hamilton Hall on Monday evening.

Trouble is reported from Sacramento over the use of Chinese-made brick on the new postoffice and a committee has been ap-pointed to investigate the matter.

Lost Ducks and Drakes. M. Barney de Vaul, although the bearer

of an aristocratic name, follows the plebean occupation of poultry-raising on a small ranch on Fifteenth avenue, near Hunters

Yesterday afternoon M. de Vaul complained to Officer McConnell at the South San Francisco police station that he was being systematically robbed and that during the past month he had missed nearly 80 ducks and drakes, to say nothing of chickens, from his ranch. Officer McConnell finally found the stolen poultry in the possession of Tchung Gen, a Chinaman living in the neighborhood. Tchung was released on his own recognizance, as he denies having stolen the ducks. ance, as he denies having stolen the ducks, but says he bought them from some young hoodlums, who are thought to be the thieves. Warrants will be issued for their arrest on a charge of burgless. arrest on a charge of burglary.

St. Rose's School. The closing exercises of St. Rose's parochial school took place on Friday afternoon, the 27th ult., and were very well attended After a very pleasing programme certificates were presented to the following graduates from the grammer class: Misses Katie Bird, Clara Mulville, May Maroney, Cora Aldrich, Cora Long, May Dunnigan; Masters Frank Hancock, Thomas Donovan, Harry Fitzgerald, Joseph Cusick and Joseph O'Donnell.

Rev. W. H. Roberts.

Rev. William R. Roberts, D.D., LL.D., the stated cierk of the general assembly of the Presbyterian Church, which recently beld its 10sth annual meeting at Portland, Or., is in the city, and will be present and address the ministerial union, which meets at 10:30 o'clock on Monday morning, in the Howard Presbyterian Church, on Mission street, near Third.

A German Fair.

A meeting of those interested in the proposed fair for the benefit of the German Old People's Home was held in the Deutscher Verein on Thursday evening. The meeting was an enthusiastic one and resulted in perfecting arrangements for a fete

which will be held at the Mechanics' Pavilion from the 21st to the 28th of Sep-tember next. The Pavilion will be handsomely decorated for the occasion and wil be fitted up with 20 booths where refresh-ments, fancy goods, etc., will be disposed

Platt of Belvidere, N. J. Besides these Dr. C. A. Briggs, accused of heresy, also arrived, and in the same hotel with him are stopping Dr. D. R. Frazer of Newark, N. J., who managed Dr. Briggs' case, and G. W. F. Birch, the chairman of the prosecuting committee. Dr. Briggs' " All those girls who are attending the Girls' High School have not the same privileges as the girls attending the Boys' High School. That is, the course of study at the Girls' High School does not qualify the pupils for immediate entry to the State University, a subsequent preparatory course being necessary, whereas the course at the Boys' High School does. There are made about 25 girls now attending the boys' only about 25 girls now attending the boys' school, so we intend moving all of them when the July term commences to the new premises of the Girls' High School, now in course of completion en Scott street. Then we shall institute a course in the latter school all through which will qualify the girls who graduate for immediate entrance to hoot and hiss and yell at the Marshal,

Valparaiso. After an hour's search in the arsenal a Siemens projector was unearthed. A 12 horse-power threshing machine was then borrowed and a dynamo was brough up from the exhibition at Santlago (140 miles distant) by special train, together with a supply of posts and wires. Thirty-two hours after the receipt of the telegram the plant was at work. It ran well for six months until the projector was blown to pieces by a shell.

ORDER IN CRIPPLE CREEK. How a Marshal Persuaded a Crowd to Postpone a Lynching.

Denver Republican

If there is any proof required at this late day that Cripple Creek is a model of good order it could be furnished by an incident a few nights ago. Two miners were desirous of settling the time-worn grudge with nature's weapons, and were repairing to a suitable spot when the Marshal stepped up and arrested one of the belligerents. He objected to the degradation to the camp that would ensue from such a scene. The East might hear of an encounter in a Colorado mining camp without sixshooters and withdraw investments. The Marshal was somewhat rough with his prisoner, and struck him with a revolver in the face. Friends of the man interfered and threatened to take the prisoner away. The Marshal drew out his gun. The people fell back and no one attempted to argue with the acting representative of law if not of order. A block further on and the Marshal, for some reason, found it necessary to assert his right to the prisoner's jawbone again. Things began to look serious, and the crowd, which was quickly increasing, began to book and his and vell at the Marshal.

Destruction by Fire of Buildings at the ing for this result ever since I went on the board, as I don't see why the girls should not rank on equal terms with the boys, and Yesterday afternoon a fire broke out in my purpose looks now like being accom-plished." he pulphouse at the Judson Powder Works ocated at Highlands two miles east of

Director Dunn said yesterday afternoon that the Girls' High School on Scott street, between Geary and O'Farrell, would be ready for occupancy at the end of vacation. The last coat of paint is now being put on in the interior, and it is expected the last contract will be finished in three weeks, another building used as a dryhouse, but t did not reach any of the buildings in which the explosives were kept. The two after which the desks and benches will be had been an explosion at the powder works and the report reached Oakland. This created considerable excitement at both

THE WORLD'S GOLD.

Figures Seem to Show That the Supply Scarcely Equals the Demand.

New York Commercial Bulletin.
The world's movement of gold for the last few years has been singular and not easily explainable. For the five years 1886 to 1890 inclusive, the annual product, according to the United States Mint Report, has averaged \$112,000,000. For the place, nor were any of their pupils there at the time. Another dancing party was be-lng given there, and it was the maneuvers like period, the amount of gold coined appears, from the same authority, to have averaged \$134,000,000. The annual coinage has therefore exceeded the production by \$22,000,000, or nearly 11 per cent. Included in the coinage, however, is a recoinage of gold coin averaging \$25 .-J. F. Carroll, wharfinger at Third and at \$109,000,000, or \$3,000,000 below the actual Berry streets, was presented by his friends average production. With some 97½ per cent of the product of the mines going into new coinage, the question arises, How has the ption in the industrial arts been supplied? Great pains have been taken by mon-etary statisticians, and especially by the divice. The presentation speech was made by George Bender of Bender Bros. Among the gentlemen present were: Mr. Inglis, George Bender, Mr. Swett, Mr. Dickins, Mr. Collins, representing the leading lumber firm on the front; Mr. Berringer, Captain L. Larsen, J. L. Vermeil, Tim Lynch and Captain Bob Gibson. rectors of our own mint, to settle the difficult problem of the quantity of gold going into this branch of absorption; but there is reason to doubt whether any really trustworthy estimate has yet been reached. Ernest Seyd, before the English select committee on the depreciation of silver estimates. mittee on the depreciation of silver, estimated the consumption from 1848 to 1870 as averaging \$34,000,000. Since that time the demand must have considerably increased, and consistent with that supposition Dr. Soetbeer estimated the consumption in 1880 to be \$55,600,000, while the Director of the United States has collected statistics which led him to conclude that this use of the metal emounted in 1886 to elected. Our Lady of Mercy took place in the old the Hill" on the 27th ult. The programme included some pleasing numbers, the most ambitious of which was the fouract drama "Through Darkness to Light." Diplomas were presented to three young lady graduates, namely: Miss L. Wallace, Miss A. Oninlea and Miss K. Wallace, metal amounted in 1886 to about \$49,-It would appear reasonable to assume

from these estimates that the current world's annual consumption of gold in the industrial arts may now amount to not less than trial arts may now amount to not less than \$50,000,000 per annum. But whence has this demand been met within these late five years if the coinage consumption of new gold has equaled the production within \$3,000,000? Part of the consumption in manufactures is supplied from old plate, watches, jewelry, etc. But, if we are to trust official reports, that portion is not considerable. Our own mint statistics are the only available information showing the different sources and forms of are the only available information showing the different sources and forms of this supply; and it is doubtful whether, after the most painstaking efforts to get the data, the real facts have been ascertained. The mint report for 1890 gives the amount of gold to be used in the United States for that year as \$13,623,000, of which \$10,113,000 is reported as domestic bullion and a small amount in coin and \$3,510,000 and a small amount in coin, and \$3,510,000 as old material and foreign coin and bullion. It would thus appar from this showing that It would thus appar from this showing that while the new coinage consumption leaves a surplus out of the production of only \$3,000,000, yet the industrial consumption of the United States alone of the direct product of the mines amounted to three times that surplus. How much greater the discrepancy would be upon the entire world's industrial takings is readily apparent.

These movements fail so widely to tally that there is manifestly great error somewhere in the data; but exactly where the mistake lies it is difficult to demonstrate conclusively. The statements of coinage should approach very closely to exactness, for they are compiled from Government reports, which above all others are exempt from liability to error. The production, however, is to a considerable extent, a matter of estimate as to the movements of which cognizance can be taken, while the small nizance can be taken, while the small streams of supply flowing through individual hands are more numerous than is generally supposed and yet escape count. It is not improbable that the new supplies thus eluding notice would make a considerable contribution toward solving this discrep contribution toward solving this discrepancy. It is a question that needs inquiry how far the bars furnished by the mints to gold workers consist respectively of metal coming from the mines and that derived from the remelting of old metal. It is by no means certain that the mines always discriminate in their reports between these different sources of supply between these different sources of supply with entire exactness and perhaps they can not always do so. It, however, it should be that much of the bar gold sold by the Government to gold-workers has come from the remelting of old metal, that would so far reduce the estimates of new gold taken by the industries and to that extent would diminish the current lack of balance in the statistics of the world's gold movement.

On an Elevated Train.

A Third-avenue elevated train was bound uptown yesterday afternoon, says the New York Commercial Advertiser. The young women held on the straps in one of the cars and gazed wistfully at the seats occu-pied by the representatives of the sterner sex. Among the latter was a man of about sex. Among the latter was a man of about 40, dressed in the latest style and with a benevolent expression of countenance. In makeup and general style he was a regular Mr. Turveytop. At Thirty-fourth street some passengers left the train and several seats were vacant. Then Mr. Turveytop asserted himself. Rising to his feet he touched the prettiest of the three ladies on the arm and said with his politest air, "Madam, might I ask you to take a seat?" and pointed to an emptly place across the aisle. It so paralyzed her that she thanked him.

Electric Lighting in Time of War. The immense advantage of the prompti-tude with which powerful electric lights can now be installed in commanding posi-tions was exemplified in the recent civil war in Chile. An electrician was sent out to Chile by a French firm of electrical en-gineers in charge of an electric light and power plant for the Santiago exhibition. Just as the exhibition was about to close the civil war broke out, and one Sun-

to the State University. I have been fight- | who made a forced march to the hall, a who made a forced march to the hall, a little log cabin.
On his return uptown the Marshal was followed by the throng, which was still increasing. He stopped opposite the Continental Hotel and addressed his enemies. He challenged any one to come forward and fight him a la Queensberry or a la Milbank, and if the would-be fighter had not a revolver for the latter style he would gladly furnish one. This was pretty strong gladly furnish one. This was pretty strong to a crowd of 1000 people, but there were no takers. The marshal seemed to own the town. He marched up and down the streets and into all the "tough joints" in town looking for a scrap. He had his gun

town looking for a scrap. He had his gun handy, while at a respectable distance the crowd jeered and hissed.

There was nothing else talked of about town all night, and the more the affair was talked of the more did the crowd get excited. Something had to be done. A gathering was held at the Flagstaff at 0:30 P. M. Several mining men of importance were in attendance. The action of the Marshal was dealt with in scathing

"Let's lynch him," shouted a tenderfoot from a distance.
"Yes, lynch him, hang him," came from a hundred throats. "Don't do anything that would reflect on the town," said Captain Farrish. "Send a deputation to tell him to leave town or be

This wiser counsel partially prevailed, but somehow a committee could not be got together to approach the Marshal. In the meantime the more excited and de-termined-appearing were getting ready for supreme action. "Bridle Bill" had been giving exhibitions by lassoing an urchin paid to be lassoed, near at hand, and his rope was secured. The lassoer was glad to give it up, although his belt was stuck full

hang him to the flagpole!" cried the leaders of the detachment.

A roar went up that could be heard on Mount Pisgah, and it began to look dark for the marshal. The more peaceably inclined hoped that he could not be found. clined hoped that he could not be found.

"Who's the blankety blanked, blank blank — that's speaking of lynching?" demanded the marshal as he walked up to the center, the crowd clearing a wide passageway. He had a six-shooter in each hand.

sageway. He had a six-shooter in each hand.

"Now come and hang me, you —!" roared the officer, brandishing the revolvers.

The crowd consulted a very short time, and it was aunounced that a lynching-bee would not be beneficial to the town, and further, that it was not hospitable to insist on an impediate departure from any energy in

side of them, and the side arms lock closely against each other. For library use these ladders are very valuable, for when folded up they are not more than one-fourth of an inch thick, all told. They are constructed of light yet firm material, and can be easily placed behind any piece of furniture and kept out of the way.

A BABY BROUGHT LUCK.

A Remarkable Incident Which Recently

Occurred in Spain. At the railway station of Fuente-Palmers, near the town of Ecija, in Andalusia, a man whose face was half conceated in a slouched hat approached the station-master and handed him a box and an open letter. handed him a box and an open letter. Then the mysterious individual went away. The official read the letter, which was without signature. It simply informed him that he had just-received a present. He immediately opened the box and was astonished to find that it contained a new-born baby richly clad. A switchman who was present took pity on the little thing and offered to adopt it then and there, and the station master was glad to get rid of it. The switchman brought it home to his wife. She was delighted with the present, and while undressing it a letter fell out of its clothing upon the floor. This, like the one which the station master received, was also without signature. It was as follows:

"Whoever takes this child and cares for it will be happy." When the good woman's surprise was over she resumed the work of undressing the baby. During the operation a heap of bank notes fell from its clothing upon the floor. Husband and wife picked up the notes and counted them. They footed up the handsome sum of 125,000 francs. Now the station-master wants that baby or rather that money, but the switchman won't give it to him, and a suit is pending in the Spanish courts.

In the recess of an old tree somebody re-

In the recess of an old tree somebody recently came across the apparently mummified body of a large gray cat. It appeared to have been quite flattened by some untoward accident, for seemingly in its dying agonies the poor animal had driven its powerful eye-teeth quite through a thick and solid branch of wood.

Dyspepsa. Recomplaints.

The temperature of the water is 98 degrees and is highly charged with Carbonic Acid-as, making it pleasant to the taste and giving to the bath a most delightful sensation.

HIGH ALTITUDE! NO FOGS! NO MOSQUITOES!

WATER FROM THE SPRINGS BOTTLED BY THE WATER CO., marriving the electrician was told to install, without delay, at Fort Boreas, a projector which would command the bay of bread on the buttered side is fatal to luck.

Just as the exhibition was about to close the civil war broke out, and one Sunday morning the electrician received at legram from the Minister of the Interior at Valparaiso ordering him to betake himself immediately to that city. On arriving the electrician was told to install, without delay, at Fort Boreas, a projector which would command the bay of bread on the buttered side is fatal to luck. There is a usage, general in France, that bread before being cut must be marked with the sign of the cross. The neglect of so marking the bread is supposed to involve misfortune. In Lille to step on bread is a blameworthy act. It is a common

ALONG SEA AND SHORE.

Litigation May Spring Out of the Romulus Salvage.

Sailor Boarding-House Keepers in a Very Tight Place-Arrival of the Survivors of the St. Charles.

The German tramp steamer Romulus, which narrowly escaped going to pieces in the bight north of Point Reyes, arrived at 4 o'clock yesterday morning, having been in tow for eight hours. The whole of the news connected with the steamer's rescue was given in yesterday's CALL and it only remains to add some details which are of interest because a heavy salvage suit and costly litigation may arise out of the matter. The Romulus left this port on Wednesday for Nanaimo and had bad weather from the start. North of Point Reyes, the sea being very rough with a strong head wind and the steamer pitching heavily, the propeller-shaft broke and the danger immediately became very great. The Remulus was in a bight with the wind blowing directly on shore not two miles away. Each wave swept her nearer and nearer the beach, and though two anchors were let go they barely held ber. At this time the steam schooner Point Loma came up and got an eight-inch hawser aboard the Romulus, which then heaved up her anchors and lus, which then heaved up her anchors and was towed slowly out. One of the interesting questions to be settled is whether the Point Loma could have saved the big steamer, for the wind, which was blowing 54 miles an hour at the start, increased to a full gale just before dark. It was at this time that the tugs Relief, Wizard and Active came up from San Francisco, ploughing their way through seas that swept ploughing their way through seas that swep clear over their pilot-houses and smoke-stacks. The Relief joined the Point Loma In tugging on the 8-inch hawser and it seemed time and time again that they must break away, but when the Wizard got her 11-inch hawser on the port bow of the Romulus and went to work in the teeth of the gale the balance of power inclined against the elements and the Romulus was safe. It took an hour and a half to pull her out of the bight, and even then, with the wind fair, the heavy sea made the towing very slow. The Active returned as soon as it was found that the Romulus was no

longer in peril, and reached this city two hours ahead of the others.

The Romulus is supposed to be worth at least \$200,000 and is owned in Hamburg, Germany. The tug people claim that the services rendered her are much more meritarious, that those for which \$5000 was torious that those for which \$5000 was awarded in the Jessomene case. It is hinted that \$10,000 is the likely figure, but there is a sphinxlike silence on all sides as to the bargain said to have been made between the captains of the Romulus and the Point Loma. It is stated that whatever arrangements may have been made, the tugs Wizard and Relief are not bound by them; that the Point Loma could not have towed the Romulus out of the bight alone, and that the Romulus was bona fide a vessel in distress and not riding securely at anchor, Very little doubt is entertained that the Romulus will be libeled independently in the interests of the owners of the Point Loma, the Wizard and the Relief. The Romulus is now being docked at the Union

SAILOR BOARDING-HOUSE MASTERS. SAILOR BOARDING-HOUSE MASTERS.
The grass is getting terribly short with the sailor bearding-house keepers, who are discussing the advisability of getting together and finding a way out of the very tight place they are in. One of them put his own case to a reporter yesterday in a very emphatic way. "I am losing \$150 a week at the present time," said he, "and I have been losing \$150 a month for the last four months. Why, just think of it. I have bad to dispose of my little property and even pawn my jeweiry to supply and even pawn my jewelry to supply rations to the sailors who have been board-ing with me and cannot get a ship. Nearly all these men are old customers, and if I turn them away it is a dead loss of every-thing I have spent on their account. Now, when these men get a ship and their allotment money is paid they are charged \$40, or two months' advance, when the ship arrives at its destination. But of this sum only \$25 is actually paid over, and they are solidly cheated out of the \$15. How it's done I don't know, but I suppose there a secret arrangement between captains and the shipping-master. result is, anyhow, that the sailor gets nothing at all; the boarding-master gets \$25, out of which he has had to keep the sailor for two months, supply him with tobacco, beer and spending money, and buy him clothes, oilskins, boots, etc. Of course when sailors are in demand, and a man is only in town for a week, there is a show for the boarding-master to make a few dollars, but now it is all the other way. You cannot beard it is all the other way. You cannot board a sailor for less than \$3 50 a week out of pocket, and this for two months will eat up the \$25 by itself. What we contend is that if Jack is to have \$40 deducted from his wages, as an alleged advance, he should receive all the money, or in some way get the benefit of the \$15 now held from him. As things are at present there is not a boardingmaster in the city who is not losing \$20 a month for every sailor in his house, and there's no remedy in sight either."

would not be beneficial to the town, and further, that it was not hospitable to insist on an immediate departure from any one in a new town.

A FOLDING STEPLADDER.

A Recent French Invention of Practical Value.

The accompanying cut represents a recent French invention in the shape of a folding stepladder, which appeals at once to the housekeeper in flats and apartments where she is often pressed for room. Two iron rods on either side move vertically in such a manner that the steps fold along
To-day the bark Alden Bessie will tow from Folsom to sea, the ship Euphrosyne from volling-mills to Oakland Creek, the schooner Ivy from stream to section 1 of the seawall, the steamer Australia from the refinery to Folsom, the bark Professor Johnson from the stream to the refinery, the ship E. B. Sutton from Harrison to the stream, the ship R. D. Rice to Mission Bay, the ship Big Bonauza from Alameda to Fremont, the bark Monitor from sea to stream, the steamer Yaquina from the Merchants' drydock to Broadway, the Alex Dunn from Broadway to the Merchants' drydock, the ship Euphrosyne from Oakland to Green. To-day the bark Alden Bessie will tow from Folsom to sea and the ship Cyrus Wakefield from Beale to Port Costa.

CATTLE OVERBOARD.

CATTLE OVERBOARD. When the stern-wheeler Caroline arrived from Leals Landing, Marin County, and docked at Jackson-street pler yesterday morning she had on board a number of fat cattle destined for Butchertown. Three of the cattle took the idea into their heads that drowning would be a more pleasant death than having their throats cut for the satisfaction of others. On this idea they jumped overboard, and for half an hour they had a great time. Two swam out to the pierhead, and then started in a go-asyou-please race to Broadway wharf. The third crawled under the piles and found a temporary shelter on the rocks forming the temporary shelter on the rocks forming the face of the seawall. Eventually ropes were obtained and the "three kickers" were

obtained and the "three kickers" were hoisted by a derrick and sent to Butchertown with the rest of the band.

Dr. T. W. Woods, the newly appointed medical inspector at Mare Island, was in town yesterday. He attended King Kalakaua in his fatal illness, being surgeon of the Charleston at the time.

Captain Watson, at present deputy commandant at the Mare Island Navy-yard, has been appointed to the command of the cruiser San Francisco and will go out on the 24th to Honoluin to relieve Commander

Sampson. The latter will be transferred to the navy-yard.

The steamer Willamette Valley, which arrived yesterday, brought down from Cape Foulweather the mate and seamen of the St. Charles, who had been left behind for treatment. Both were horribly burned and disfigured and on arrival here were removed in an ambulance to the Marine Hospital.

The big Norwegian bark Urania com-pleted her loading vestorday. She carries a miscellaneous cargo. Rates are so low that it is said that she will lose \$5000 by the The cofferdam of the ferry-slip was raised yesterday, the pyramid-pier having been completed. The cofferdam will be lowered again at a point six feet distant and another

concrete pyramid constructed within it.

The American ship McDonald, one of the finest vessels affoat, is now hourly expected from New York.
The steamer St. Paul will leave for the Arctic this morning. She will take up a party to search for the nine miners who left for the Yukon River region a year ago. Over 250 tons of stores, in 2500 packages, have been shipped from the Mare Island Navy-yard to the St. Paul for conveyance

to the various vessels on the Bering Sea Piper, Aden & Co. have received a warm letter of thanks from the Sisters of St. Dominic at Vallejo for the treat afforded by them to the school children on the steamer

Chief Wharfinger Boobar left for San Diego on the steamer Corona yesterday. Captain Dan Haskell of the tug Fearless

has gone to Cazadero.

The lighthouse tender Madrono will visit the lighthouses in the twelfth district next month. Lieutenant-Commander Perry has gone to San Diego on a tour of inspec-The charters for the week have been the

ship Cyrus Wakefield, wheat, etc., to Liverpool, at £1; British ship Bay of Naples, wheat, for Cork, owner's account; ship W. A. Campbell, 1348 tons, lumber, for Cork; barkentine S. G. Wilder, return to Honoluluin Hawaiian line. in Hawaiian line.

A NEW TRICK WITH CARDS.

Old Manipulators of the Pasteboards May Be Eastly Fooled. Chicago Times.

Card tricks are always interesting, and professional magicians have acquired in the handling of several packs of cards at a time a celerity which looks marvelous, to say the least, to their audiences. With a little practical ingenuity even amateurs can perform card tricks that mystlfy their friends and defy discovery. In this case the cards are prepared beforehand. It is necessary to procure 16 aces of hearts, eight jacks of diamonds and eight queens of clubs. The latter 16 cards are cut in half diagonally with a penknife and a ruler, following a line as shown in the cut. These cards

are then pasted on the back of the ace cards in such a manner that one-half of the card presents the jack of diamonds and the other the queen of clubs. This ends the prepara-

tion of the game.
A second pack of cards is secured, and this is composed of 30 cards, containing 10 each of the three series of which the prepared deck is made up. As only the bottom of the cards is exposed the subterfuge is not discovered by the audience. One of their number is delegated to draw a card from each one of the three series that are spread out before him. The person choosing the eard is, of course, not aware that they are

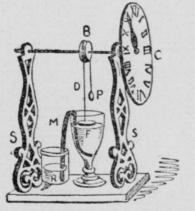

When the three cards have been chosen the prestidigitator lays his pack leisurely the prestidigitator lays his pack leisurely on the table, in the meantime engaging the altention of his audience by constantly talking to them and placing the prepared cards on top of the deck. They are then spread out and held up to view as shown in the cut, so that the thumb which holds the cards covers the lower portion, head and club of queen, and presenting only the jack of diamonds. When these cards are returned to the other pack they are are returned to the other pack they are placed at the bottom of the same. The same performance is repeated, bringing the queen of clubs to view, and at last, as the eards are turned upside down, the aces of hearts appear, and are spread out on the table alongside the other deck and gathered up again in a nonchalant manner by the

It frequently happens that some one in the audience will demand some investiga-tion of the cards, and for that purpose the prestidigitator has a third pack of cards about him, composed of 46 cards, each one different from the other, which he produces after a little hesitation, letting the other deck disappear in a convenient pocket.

THE SIPHON CLOCK.

How the Hours May Be Indicated by Simple Contrivance. A very interesting contrivance, that can easily be constructed by an amateur, is attracting attention in France. Over the top of two side supports or side arms a crossbeam is placed in the shape of a knitting-needle, which must be perfectly straight, of course, and connected at one end with a small hour hand that moves around a dial. A tiny pulley swings around the center of the needle, and in the groove of

this pulley runs a thread, to one end of

which is attached a float, and to the other end a balance weight. An ordinary candle-wick passes from the larger glass into the wick passes from the larger glass into the smaller one by its side. As soon as the large glass is filled with water the operation begins, the wick gradually absorbing the water, making the float fall lower and lower, which action determines the movement of the hand on the dial. The clock is easily regulated; if it goes too fast the thickness of the wick must be diminished; if too slow it must be increased. The form and size of the large glass on which the regularsize of the large glass on which the regularity of the clock depends has been determined by N. Pellat of the Faculty of Sciences in Paris, but with a little careful study even an ordinary glass can be made to render good service. der good service.

Carving Stone by Electricity. The elaborate stone work which adorns the exterior of some of our finest buildings,

ROYAL

Best Baking Powder

The Official Government Reports: The United States Government, after elaborate

tests, reports the ROYAL BAKING POWDER to be of greater leavening strength than any other. (Bulletin 13, Ag. Dep., p. 599.)

The Canadian Official Tests, recently made, show the ROYAL BAKING POWDER highest of all in leavening strength. (Bulletin 10, p. 16, Inland

In practical use, therefore, the ROYAL BAKING Powder goes further, makes purer and more perfect food, than any other.

Government Chemists Certify:

"The Royal Baking Powder is composed of pure and wholesome ingredients. It does not contain either alum or phosphates, or other injurious substances. "EDWARD G. LOVE, PH. D."

have knowledge.

"The Royal Baking Powder is undoubtedly the purest and most reliable baking powder offered to the HENRY A. MOTT, M. D., PH. D." "The Royal Baking Powder is purest in quality and highest in strength of any baking powder of which I

public and private, is the result of slow and tedious working by hand. The carving of stone can now be done in less than half the time formerly occupied by the use of an electrical reciprocating tool. This can be reciprocated to the control of the carving th regulated to strike a series of blows at any speed and with any degree of force, and thus the physical labor hitherto necessary is done away with. The instrument is also coming into use in the studios of sculptors, who are much hampered by the material restrictions involved in the working out of their ideas. The sculptor can now devote his entire attention to the lines the instru-ment is to follow, and the cutting of the marble is done far more rapidly and accu rately than it would have been by muscular

power.

who in spite of his large income was always in debt, sat one day in a barber's chair waiting to be shaved, says London Tit-Bits. He was lathered, when the door opened and a tradesman entered who happened to be one of the poet's largest creditors. No sooner did this way see Saint Falk trans sooner did this man see Salnt Folx than he angrily demanded his money. The poet composedly begged him not to make a scene. "Won't you wait for the money until I am shaved?" "Certainly," said the other, pleased at the prospect. Saint Foix then made the hopher wilesee.

A Creditor Outwitted.

The celebrated French poet, Saint Foix,
