

Latest Scientific Researches Show the True Cause of Disease

In his treatise, "The Spine in Health and Disease," Dr. J. F. MacConnell, of Chicago, and his colleagues have been experimenting upon animals in order to determine scientifically whether disease will occur in distant organs after vertebrae have been slightly displaced. Microscopic examination of specimens taken from the organs of the animals prove this conclusively. Changes in the stomach, kidney, pancreas and practically all the organs in the body was marked. In two animals a goitre was produced."

Spinal Analysis and IRIDIAGNOSIS

This illustration shows the parts that are affected by nerves leading from each bone in the spinal column.

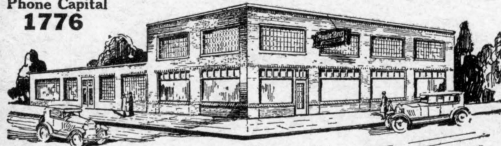

This proves that Chiropractic is the science dealing with the cause of disease and how to eliminate it. Are YOU AWARE that the Chiropractor is the only one who understands these principles and knows how to correct such conditions?
