

VOICE RECORDING SIGNAL

If you hear a short high "beep" tone every 15 seconds or so, it means that the person with whom you are talking is recording your conversation. This signal is produced by recorder-connector equipment furnished by the Telephone Company. Use of a recorder on the telephone line without this equipment is prohibited by the Company's tariffs.

HOW TO CALL SOMEONE ON YOUR PARTY LINE

To find out the number of a telephone on your party line, call Repair Service by dialing 114. If a special number is needed to reach the party you want, Repair Service will give it to you.

When you finish dialing this special number, replace your receiver. Your telephone and the called telephone will ring at regular intervals. Ringing will stop when the called telephone answers. Lift your receiver and begin conversation. If ringing does not stop after a reasonable period, you can stop it by lifting your receiver.

From EDgewood 2, FRontier 1, GArden 1, 8 and HICKory 4 Telephones—Dial the listed number. When you hear the party line signal here's what to do. If there is a single numeral on your dial number plate opposite "PTY code" dial that numeral after you hear this tone. When you hear a "busy" signal hang up. If there is no numeral on your dial number plate opposite "PTY code" hang up as soon as you hear the party line signal.

Your telephone and the called telephone will ring at regular intervals. Ringing will stop when the called telephone answers. Then lift the receiver and start conversation. If ringing does not stop after a reasonable period you can stop it by lifting your receiver for a moment.
