

Suppose your phone gets out of whack on a Saturday night — if it's an emergency to you, it's an emergency to us.

Maybe someone in the family is ill. Maybe you're expecting an important call.

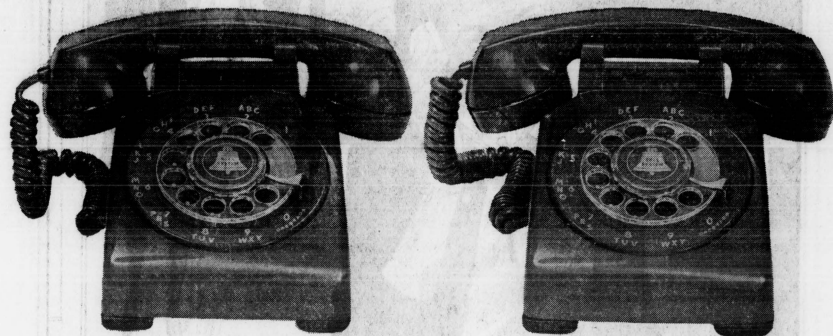

Call us at Repair Service and let us know what's wrong. You'll find the number listed in the front pages of the phone book.

Whether your phone needs repairing after-hours or on weekends, we'll do everything we can to help. If there's trouble on the line, we may be able to fix it without a repairman coming out. But if necessary, he'll be out to get your phone working again.

If immediate repairs are not required, we'll fix the phone on the next regular workday. And there's never any extra charge.

Pacific Telephone

This is an ordinary telephone.

This is a telephone designed for people with impaired hearing.

What's the difference? Only that one has a tiny control underneath the handset to adjust the loudness of incoming voices. Quite helpful to those with impaired hearing.

For further information, just call your Telephone Business Office.
